## **Clark County**

Clark County, currently the fastest growing region in the state of Washington, and one of the fastest growing metropolitan areas in the United States, is located in the heart of the Pacific Northwest. The City of Vancouver, the County seat, is home to Historic Fort Vancouver built by Hudson's Bay Company in 1824. Prominent geographic features, a rich heritage, abundant natural resources, and an expanding economy have influenced the past, and continue to influence the direction set by Clark County leadership. The following sections *Local Community* and *County Government* explore and describe the County's physical characteristics, demographics, economy, organizational structure, and elected offices.

#### **Local Community**

The planning and budget process is impacted by numerous factors, including current trends and issues which emanate at the regional and/or national levels. The information that follows describes the environmental, community, and economic factors that determine governing and budgetary decisions at the local level.

#### **Geography and Climate**

Located in southwestern Washington State, Clark County is approximately 70 miles from the Pacific Ocean. It is physically compact, measuring approximately 25 miles across in either direction, encompassing 656 square miles. The Columbia River forms the western and southern boundaries of the County, with over 40 miles of river frontage. The Columbia is the only fresh-water harbor accommodating ocean-going commerce on the entire West Coast of North America, and the only water-grade route through the Cascade Range between Canada and California.

While the Columbia River forms the County's southern boundary, the Lewis River forms the northern perimeter. Annual rainfall averaging 40 inches a year contributes to other waterways and lakes in the region, such as the Washougal River, Salmon Creek, and Lacamas Lake.

Clark County lies within the Willamette-Puget trough, a geographic basin created by the Cascade and Pacific Coast mountain ranges. The Cascade Mountain range dominates the eastern border of the region, with the frosty white peaks of Mount St. Helens, Mount Hood, and Mount Adams prominent features on a clear day. The Cascades extend from southwestern Canada, through the States of Washington and Oregon, into northern California. The mountain range was named for the great cascades of the Columbia River.

The climate in Clark County is influenced by this geography, which produces the wet, mild winters and moderately dry summers, characteristic of the region. About 70% of annual precipitation occurs between the months of November through March. An annual average temperature of 51° Fahrenheit provides a mild, yet temperate, climate.

Sustained population growth, especially in the unincorporated areas of the region, is one of the most significant factors impacting the County's planning and budgetary processes.

# Population Growth 400,000 300,000 100,000 1990 1995 1999 Urban Rural

#### **Growth and Urbanization**

Clark County continues to transition from a small, urbanized area surrounded by rural farmlands, to a suburban-urban setting. Population in Clark County has been on the increase since 1971. The County experienced rapid growth in the mid-to-late 1970s, which slowed tremendously in the early 1980s as the local economy weakened. However, due to diversification of local industries throughout the 1980s, the County was able to deflect an economic slowdown. The County has experienced a period of rapid, prolonged growth since 1987.

Growth in Clark County can be attributed to a number of factors. Contributing factors include its relationship with the Portland, Oregon metropolitan area, transportation facilities, expanding business base and quality of life. The County is included in the Portland, Oregon standard metropolitan statistical area (SMSA). Clark County represents just under 19% of the SMSA.

In December 1994, Clark County adopted a comprehensive land use plan pursuant to the State of Washington Growth Management Act of 1990. The Clark County 20-year Comprehensive Growth Management Plan identified key indicators to be compiled and summarized on an annual basis. The Department of Community Development completed the first analysis of available data in 2000, for the period 1995-1999. The report provided an overview of population, housing, employment, wages, per capita income, land absorption, and urban versus rural development. Clark County is in the process of updating the Comprehensive Growth Management Plan, with amendments to be considered in December 2003. The current Plan review is focused on revisiting urban growth areas, projecting population growth, planning housing needs, balancing growth in rural and urban areas, determining density and zoning, paying for growth and concurrency, and locating business, industry, and jobs.

#### **Demographics**

Clark County is the most rapidly developing of Washington's counties and has gained attention as one of the fastest growing areas in the nation. Sustained population growth, especially in the unincorporated areas of the region, is one of the most significant factors impacting the County's planning and budgetary processes. In the last thirty years, Clark County's population has increased 169 percent. In total, the County grew by approximately 162,000 residents (89%) from 1980 to 2000. Over the five-year period from 1995 through 1999, Clark County's population increased by 54,000. Of that increase 19% or 10,186 new people moved into the unincorporated area, and 81% or 43,814 new residents migrated to the urban area.

In 1980, the County's 192,227 residents (308 people per square mile) accounted for 4.7 percent of the State's population. Today, Clark County's estimated 2001 population of 360,760 (550 persons per square mile), represents over 6% of the state's population.

## According to the US Census, estimated People Quick Facts for Clark County, include:

T / 10001 E /: / 1D 1 /:	260.760

The Washington Office of Financial Management conservatively projects the population of Clark County will reach just over 500,000 people by the year 2020.

#### **Local Economy**

The economy in Clark County has grown steadily since the late 1980's. Clark County's traditional manufacturing base experienced little employment loss during the extensive restructuring of the past two decades. Important sectors such as paper products, aluminum smelting, lumber and wood products, food processing, textiles and apparel have long been a prime source of higher paying jobs. Relatively low development costs and a strong labor force have attracted branch plants to the County. High technology industries such as Hewlett-Packard, Sharp, SEH America, Kyocera and Matsushita Electric have located in Clark County since the late 1980's, replacing the historic dominance of the lumber industry. More recent industrial expansions sited in the City of Camas include Underwriters Laboratories and Wafer Tech. The growth of high tech jobs in the County has contributed markedly to stabilizing and diversifying the local economy.

Despite the 1991 recession, the Clark County economy proved remarkably resilient. Unemployment rates have consistently hovered between three and four percent since 1995; with the local 2000 unemployment at 4.2%, somewhat below the state average that year of 5.2%. The local labor force increased from 127,500 in 1990 to 176,300 in 1998. Employment in the manufacturing sector of the County increased by approximately 20,000 jobs, or 17.6% between 1990 and 1998. Jobs in the wholesale / retail trade and service sectors experienced a rate of increase of 50%; with jobs in Transportation and Public Utilities growing at the fastest rate of 96.9%. Government employment was just over 10% of the labor force or 18,500 jobs, whereas construction and mining was approximately 6%, also expanding at a significant rate of 63.5% since 1990.

Clark County's robust, diverse, and growing economy is integrally linked with the Portland, Oregon metropolitan area. Transportation facilities, serving both sides of the river, have created a regional hub for commerce. The area has served deep-sea commerce since 1906. Large oceangoing ships can navigate the lower Columbia River as far as the Ports of Vancouver and Portland; and with the aid of locks, smaller marine vessels can continue to the Dalles, Oregon. Transcontinental rail lines serving the County traverse major north-south and east-west routes. Interstate 5 and 205 provide access to the vital economic centers of Seattle, Washington, San Francisco, California, and points beyond. The Portland International Airport, just fifteen minutes south of Vancouver, is an essential community and economic development asset.

Generally considered a *bedroom community* to Portland, many of Clark County's traditional sectors actually pre-date the rise of metropolitan Portland. As the cost of doing business in Portland rises, the County will become increasingly more attractive to expanding corporations. However, Clark County is experiencing an increasing demand for services, characteristic of the residential nature of a bedroom community, thereby currently creating a challenging situation for Clark County leadership. A rise in industrial and commercial development is needed to generate the compulsory increases in public revenues that are required to satisfy growing service demands.

Despite rapid population and employment growth, wages in Clark County have remained below the state average. Official estimates indicate per capita income in 1997 at 96.8% of the state average, an improvement over the 1991 rate of 92.3%. However, per capita income in the County exceeds the national average. Clark has a smaller share of high-paying corporate-services such as law, banking, securities, insurance and consulting due to the proximity to Portland; on the other hand, the County has seen a rapid rise in well-paying trucking and warehousing jobs.

In addition to the economic growth in Clark County the completion of a full service satellite Washington State University (WSU) campus in Vancouver has enhanced the availability of higher education opportunities in the Clark County area. WSU-Vancouver is the primary provider of undergraduate and graduate level college education in the County. Clark County has a relatively well-developed higher education sector, as well as access to additional programs in the greater Portland area.

#### **Annexation**

Annexation is the process whereby a city expands its boundaries to encompass new areas. This can happen when a majority of the residents of an area adjacent to a city vote to be annexed, or when the owners representing two-thirds of the property value in such an area sign petitions for annexation.

A significant portion of local tax revenues generated by the annexed area shift from the County to the city when an annexation occurs. The main revenue sources affected are sales tax (85 percent of which goes to the annexing city) and property tax (of which the Road Fund portion, or about 57 percent, goes to the city). At the same time, responsibilities for providing many services to the annexed area (notably police protection, road maintenance, and parks maintenance) are also shifted from the County to the annexing city. The County retains responsibility for regional services to the newly incorporated area.

The financial effects of annexations on the County depend on the level of service demands shifted to the annexing city. If the shifted service costs exceed the revenues lost, the net effect on County finances is positive. More resources become available for regional services and local services to unincorporated area residents. If the revenues lost exceed the service costs, the impact is negative, and County-provided service levels are likely to suffer. Typically, annexations of areas which are predominantly residential have a positive net effect on County finances, while annexations of areas which are predominantly commercial have a negative net effect.

The Vancouver Mall annexation was the first of a series of annexations that reshaped the structure and functions of County government in this community. A team of staff from the City and the County work together to ensure that collaborative transition planning is completed during periods of annexations.

The 1997 annexation by the City of Vancouver of the Evergreen and Cascade Park areas, included 57,500 citizens, and was the largest annexation in the history of Washington State. A transition agreement with Vancouver mitigated the impact of this annexation, but the significant

Significant portions of the local tax revenues generated by the annexed area are transferred from the County to the annexing city when an annexation occurs.

impacts of this and prior annexations go well beyond their short-term financial effects.

#### Quality of Life / Recreation

Clark County, situated along the mighty Columbia River with the majestic Cascade Mountains for a backdrop, is an ideal setting for work and play. Residents enjoy the opportunity to choose a rural life style, within close proximity to urban amenities. There are a wide variety of recreational opportunities and cultural activities in the area, complimenting the well-balanced economy.

The County has over 20 art organizations, many available through the Columbia Arts Center; and numerous community events such as the Clark County Fair and Fourth of July Festival. There are numerous historical sites and museums throughout the region, including the Vancouver National Historic Reserve. The metropolitan amenities of Portland are just minutes away across the Columbia River.

Recreational opportunities are numerous in and around Clark County. There are over 40 miles of Columbia River frontage for fishing and boating. The Pacific Ocean and beaches to the west, Mount Hood and Mount Adams ski areas, Gifford Pinchot National Forest, as well as Mount St. Helens National Volcanic Monument are all within an hour's drive. The Columbia River Gorge National Scenic Area, originating in Clark County, is renown for sightseeing and recreational opportunities, including world class windsurfing and boating. Picnicking, hiking, equestrian trails, bicycling, canoeing, fishing, hunting, skiing, swimming, and boating are popular activities. A diverse selection of golf courses can be found in the County and Portland metropolitan area.

The County has partnered with the City of Vancouver to operate a jointly funded parks and recreation program. There are 55 city parks and 8 regional parks, along with other special facilities for local residents, including the Columbia River Renaissance Project, providing multi-use development and access to the Columbia River.

On March 23, 2000, more than 200 citizens of Vancouver and Clark County gathered to take part in "Vision 2000," a symposium dedicated to planning for the future of open space in Southwest Washington. Individually and in groups, they consider issues such as a 50 and 100 years vision; defined elements of an open space plan; quality of life; and creating a community with the needs of future generations in mind.

## **County Government**

In the United States, government is divided into separate branches (legislative, executive, and judicial) and layers (federal, state, and local). Each branch and each layer is partially independent of the others. At the local level, government is further divided among general-purpose entities, like cities and counties, and a number of special purpose districts, such as school, utility, and fire districts. Finally, separate local governments often form cooperative inter-local agencies to carry out designated responsibilities.

The Pacific Ocean and beaches to the west, Mount Hood and Mount Adams ski areas, Gifford Pinchot National Forest, as well as Mount St. Helens National Volcanic Monument are all within an hour's drive. The Columbia River Gorge National Scenic Area, originating in Clark County, is renown for sightseeing and recreational opportunities, including world class windsurfing and boating.

A county is a political subdivision of the state. Counties derive their existence from state law and powers expressly conferred by the state constitution and state laws.

Locally elected officials, including the Board of County Commissioners govern counties, and these officials have considerable latitude to establish policies on the basis of the local community's needs and preferences.

#### **Clark County Elected Officials**

Dates shown represent the expiration date of the officials' current term.

Commissioner (District 1): Betty Sue Morris 12/31/04
Commissioner (District 2): Judie Stanton
Commissioner (District 3): Craig Pridemore 12/31/06
Assessor: Linda Franklin12/31/06
Treasurer: Doug Lasher12/31/06
Auditor: Greg Kimsey12/31/06
Prosecutor: Art Curtis
Sheriff: Garry Lucas
Clerk: JoAnne McBride 12/31/06

Therefore, no government entity stands entirely on its own. Rather, each entity is part of a network of governments, working together to deliver services to the public.

To understand a particular unit of government, it is useful to have a concept of its place in the overall system. The purpose of this section is to generally explain how Clark fits into this system, and how county government relates to the federal government, the State of Washington, the cities within the County's borders, and the many special districts which serve Clark County's residents.

A county is a political subdivision of the state. Counties derive their existence from state law and powers expressly conferred by the state constitution and state laws. For example, counties are required to appraise property values for tax purposes, and to collect property taxes from their residents. In this regard, counties act as agents for state government.

Locally elected officials, including the Board of County Commissioners govern counties. These officials establish policies on the basis of state law and in the context of local community needs and preferences.

Counties co-exist with a variety of other overlapping local government entities, including cities. The relationship between county and city governments can be slightly confusing. Many County services are "regional," meaning that they are provided to all residents of the County, regardless of the jurisdictional limits of a city. Property appraisal is a good example. The County appraises all property, whether or not it lies within an incorporated city. Local county services, however, such as Sheriff's patrol, are generally provided only in the unincorporated portion of the County.

#### **Organization of County Government**

Clark County is a *statute county*, which means that the organization of the County is prescribed by state statute. The following organization chart provides a bird's-eye view of the County structure, including its elected officials, administrator, and major departments. For simplicity, the chart does not include the numerous inter-local organizations, advisory boards, or other organizations that are partially or wholly under the jurisdiction of the County.

Locally elected officials, including the Board of County Commissioners govern counties, and these officials have considerable latitude to establish policies on the basis of the local community's needs and preferences.

As the following chart depicts, the voters of Clark County elect twenty-two officials, including three County Commissioners, eight Superior Court Judges, five District Court Judges, an Assessor, a Treasurer, an Auditor, a Prosecuting Attorney, a Sheriff, and a County Clerk.

The Board of Commissioners appoint a County Administrator, who acts as the chief executive officer for the County. Reporting directly to the County Administrator are the heads of the nine major non-elected departments:

- Community Services and Corrections (the County's social service agency)
- Community Development

#### Superior Court Judges

#### **County Elected Officials**

Board of County Commissioners - The three-member Board of County Commissioners is the County's legislative body. The Board levies all County taxes and appropriates all funds for expenditure through the budget process. It sets land use policy in the unincorporated area and hears appeals to land use decisions. It enacts ordinances that have the force of law in the County. It appoints members of citizen advisory panels, hearings examiners, and members of the Board of Equalization. It approves all contracts and grant agreements. The Board adopts the County budget. Finally, it appoints the County Administrator, the chief executive of the County. Primary elections of Commissioners are held by district, while the general election is county wide. Commissioners serve a four-year term. Election terms are staggered so that no more than two Commissioners stand for election in any single year.

**Assessor** - The Assessor is responsible for the appraisal of all real and personal property in the County for the purpose of assessing property taxes. The Assessor also supervises the County's Geographic Information System (GIS). The Assessor is elected at large to a four-year term.

**Treasurer** - The Treasurer is responsible for the collection of all property taxes, the distribution of property tax revenues to the State and other taxing districts, receipting all money received by the County, and cash and investment management. The Treasurer provides services both to the County and to other government entities, including school and fire districts. The Treasurer is elected at large to a four-year term.

**Auditor** - The Auditor is responsible for the recording of documents, titles, and deeds; the issuance of marriage licenses; the issuance of motor vehicle licenses; and the conduct of all elections. The Auditor also provides accounting services, performs fiscal analyses, and conducts audits. The Auditor is elected at large to a four-year term.

**Prosecutor** - The Prosecuting Attorney is responsible for the prosecution of all crimes and violations of County ordinances. The Prosecutor also acts as legal counsel to the County and other local government entities. In addition, the victim/witness assistance program, adult diversion program, and the child support enforcement program are under the supervision of the Prosecutor. The State of Washington reimburses the County for one-half of the Prosecutor's salary. The Prosecutor is elected at large to a four-year term

**Sheriff** - The Sheriff is responsible for the provision of police services in the unincorporated portion of the county, including patrol, criminal investigation, and emergency response. In addition, the Sheriff administers the County Jail. The Sheriff is elected at large to a four-year term.

#### **District Court Judges**

Dates shown represent the expiration date of the officials' present term.

District One: Vernon L. Schreiber12/31/06
District Two: Scott S. Anders12/31/06
District Three: Darvin J. Zimmerman12/31/06
District Four: Kenneth R. Eiesland12/31/06

Randal B. Fritzler ......12/31/06

District Five:

**Superior Court Judges** - Superior Court is the trial court for all felonies and civil cases involving amounts over \$25,000. Superior Court also has jurisdiction over divorce, probate, juvenile, competency and domestic cases. Superior Court Judges are considered to be partially employed by the State of Washington, so the State pays one-half of their salaries and all of their benefits. Clark County has seven Superior Court Judges who are elected at large to four-year terms.

**District Court Judges** - District Court is the trial court for ordinance infractions, misdemeanors, and civil cases involving amounts up to \$25,000. Clark County has five District Court Judges who are elected at large to four- year terms.

**Clerk** - The County Clerk is responsible for maintaining the permanent records of the Superior Court, including all legal filings and records of all court proceedings. The Clerk is also responsible for receipting all monies received by the Superior Court. The Clerk is elected at large to a four-year term.
